

Why pay Google for more cloud storage when you can use Google Takeout and TakeoutWrangler?

With TakeoutWrangler, you can easily transfer your photos and videos from Google Takeout to your computer, freeing up space on your phone without losing any precious memories. TakeoutWrangler ensures that every photo and video is accurately copied and even detects media with the same name but different content.

Use your preferred cloud service like OneDrive, DriveBox, AWS, or your own archival methods so your media is safely preserved.
