

Why pay for more cloud storage when you can use Google Takeout and TakeoutWrangler?

With TakeoutWrangler, you can easily transfer your Google content like email, photos and videos from Google Takeout to your computer, freeing up space on your phone without losing any precious memories. TakeoutWrangler ensures that every file, photo and video is accurately copied and even detects files with the same name but different content.

Use your preferred cloud service like OneDrive, DriveBox, AWS, or you your own archival methods so your media is safely preserved.

Use Configuration/Settings to change Takeout Wrangler behavior.

Takeout Wrangler Settings
