

Note: Google Takeout does not delete or change your data in the Google storage space.

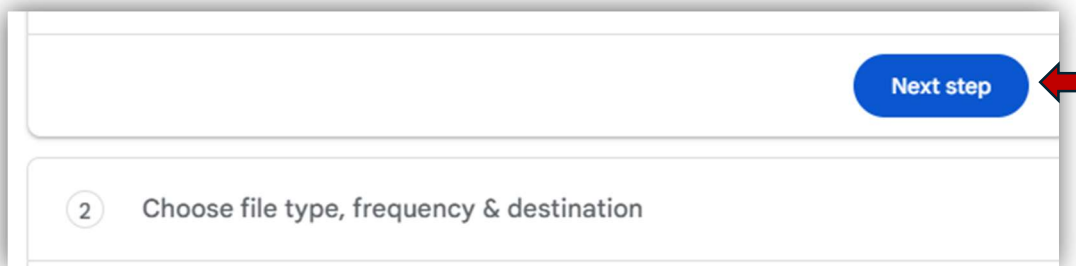

- 1) Open [Google Takeout](#).
- 2) You can select all or just a specific type of content to takeout.
- 3) To select only Photos, click "Deselect all" to uncheck all Google products.

- 4) Scroll down and check the "Google Photos" checkbox. Generally, leave the "Multiple formats" and "All photo albums included" options as they are.

- 5) At the bottom of the page, click "Next step".

- 6) Keep the default options: "Transfer to: Send download link via email", "Frequency: Export once", "File type: .zip", "File size: 2 GB". Click "Create export".

Choose file type, frequency & destination

Destination

Transfer to:

Send download link via email

When your files are ready, you'll get an email with a download link. You'll have one week to download your files. [Learn more](#) about how to locate, access, and share your data.

Frequency

☒ Export once
1 export

☐ Export every 2 months for 1 year
6 exports

File type & size

File type:

.zip

Zip files can be opened on almost any computer.

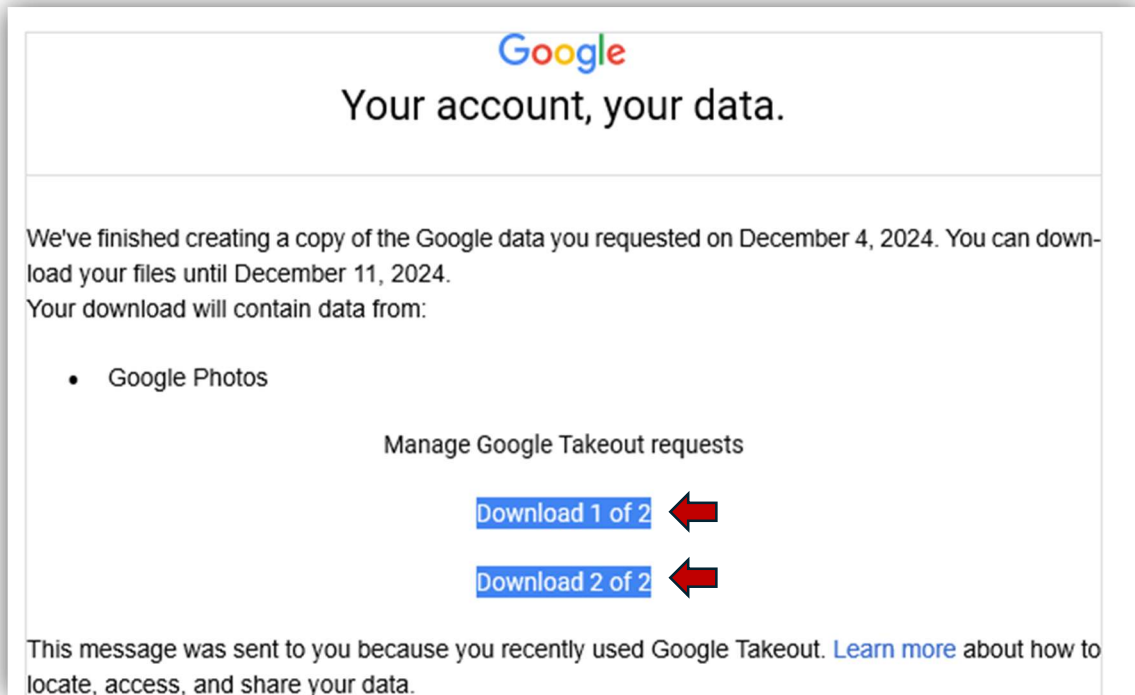

File size:

2 GB

Exports larger than this size will be split into multiple files.

Create export

- 7) When you receive the email from Google Takeout, download each file to your "Downloads" folder or a folder of your choice. This may take some time and there may be many downloads.

- 8) Use TakeoutWrangler to process the Google Takeout .zip files from your download folder to your local computer.
- 9) After verifying your local content, you can delete the Google Takeout .zip files from your download folder.
- 10) Never delete files from your Google Photos storage until you've verified you have them locally.
- 11) Clean up old photos from Google Photos to recover space in your Google storage.
